WORK EXPERIENCE

Technical Lead

Temenos india Pvt Ltd

07/2015 - Present

Chennai

Achievements/Tasks

- Directed front-end architecture initiatives by introducing modular design principles, enabling seamless integration of advanced UI frameworks and facilitating scalable development workflows.
- Built deeply nested, schema-driven UI systems based on Swagger/OpenAPI metadata for dynamic form rendering.
- Implemented custom Lit components with Shadow DOM, improving reusability and performance.
- Developed complex dynamic multi-value fields, object arrays, nested form structures, and recursive rendering modules.
- Integrated UI components with backend APIs using JSON/YAML metadata.
- Improved UI rendering performance by optimizing recursive logic and reducing DOM overhead.
- Documented UI component patterns, coding standards, and developer usage guidelines.
- Directed front-end architecture initiatives by introducing modular design principles, enabling seamless integration of advanced UI frameworks and facilitating scalable development workflows.
- Implemented WCAG-compliant UI components ensuring accessible navigation, semantic markup, and keyboard operability.
- Designed and implemented TCXB product and balance-netting UIs leveraging the UXP platform, consuming T24 APIs to enable seamless core-banking integration.
